Subject Index

A

Anisotropic thermoplastic composites, solidification in, 406

C

Carbon/polycarbonate, and Kevlar/polycarbonate composites, acoustic emission in, 211
Cellulose/polyethylene composites, interfacial phenomena in, 301
Chopped fiber reinforced composites, impact behavior of, 253
Composite interfaces
nuclear magnetic resonance spectroscopy and, 121
use of dynamic mechanical analysis, 105
Composite materials
assessment of fiber arrangement and contiguity in, by image analysis, 274
cure of polymers and, using microwave energy, 184
determination of matrix crystallinity of, by x-ray diffraction, 201
fracture of, micro/macro approach, 314
of poly(vinyl chloride) and wood fibers, effect of chemical treatment, 84
polyetheretherketone based, processing and structural optimization of, 65
random glass mat reinforced
analysis of model materials, 45
phenomenology of tensile modulus variations, 32
testing polymers and, with Iosipescu shear test method, 286
wood fiber-polystyrene and recycling, chemithermomechanical pulp as reinforcing filler, 77
Composite structures
liquid crystal polymer fibers, in thermoplastic matrix, 10
optimizing passive damping of, integrated method for, 328
Compression molding, short fiber orientation in, numerical simulation of, 164

D

Digital image processing, analysis of two-phase materials, with spherical inclusions, 158
Dilute suspensions, fiber orientation in, analytical solutions for, 56

E

Epoxy
composites, thermal and electrical properties of, 133
graphite-reinforced and a rubber-modified, comparison between bending and torsion methods on, 90

F

Failure behavior, short-fiber-reinforced poly(ether ether ketone) composites and, 126
Fiber orientation, 2-D flows of dilute suspensions and, analytical solutions for, 56
Fibrous composites, response to impact loading, 144
Fracture
in composites, micro/macro approach, 314
of hybrid composites, with continuous and short fibers, 291
of resin matrix composites, 322

G

Glass fiber-reinforced composites, effect of water on, multi-nuclear NMR spectroscopic and proton NMR imaging studies, 192
Glass-resin, prediction of internal stresses, 19
Graphite fiber-reinforced composites, friction and wear behavior of, 337

H

Hybrid composites, fracture behavior of, with continuous and short fibers, 291

I

Imaging studies, multi-nuclear NMR spectroscopic and proton NMR, on the effect of water in glass fiber-reinforced composites, 192
Impact loading, response of fibrous composites to, 144

K

Kevlar/polycarbonate, and carbon/polycarbonate composites, acoustic emission in, 211

L

Laminate bend-forming, composites, prediction of material response to processing, 387
Laminates, thermoplastic composites, press-forming of, 114

M

Microwave energy, cure of polymers and composites by, 184
Mold filling, in anisotropic porous media, in composite manufacturing processes, 398

P

Passive damping, of composite structures, integrated method for, 328
PMR-15/C3K composites, compression molded, effect of processing parameters on, 379
Poly(butylene terephthalate), poly(ethylene terephthalate) and, water sorption, 1
Polyetheretherketone
composites based on, processing and structural optimization of, 65
press-formed carbon-fiber-reinforced, thermoplastic composites and, 114
short-fiber-reinforced composites of, failure behavior and, 126
Polyetherimide composites, Stress cracking and failure mechanisms in, 240
Poly(ethersulfone), polystyrene and, weathering of, 24
Poly(ethylene terephthalate), poly(butylene terephthalate) and, water sorption, 1
Polymer fibers, composite structures, in thermoplastic matrix, 10
Polymers, cure of composites and, using microwave energy, 184
Poly(phenylene sulfide), high performance matrix polymers, melting behavior of, 265
Polypropylene, nickel powder filled composites, thermal properties of, 223
Polystyrene, poly(ethersulfone) and, weathering of, 24
Poly(vinyl chloride), composites of wood fibers and, effect of chemical treatment, 84

R

Recycling, effect on wood fiber-polystyrene composites, chemithermomechanical pulp as reinforcing filler, 77
Resin-fiber interface, in polyurethane and polyurethane-unsaturated polyester hybrid, 174
Resin matrix composites, fracture of, 322

S

Shear strength, fiber/epoxy interfacial, effects of environmental exposure on, 217
Shear test, Iosipescu method, as used

Resin-fiber interface, in polyurethane and polyurethane-unsaturated polyester hybrid, 174
Resin matrix composites, fracture of, 322

S

Shear strength, fiber/epoxy interfacial, effects of environmental exposure on, 217
Shear test, Iosipescu method, as used

· for testing polymers and composite materials, 286
Short-fiber composites
fracture of, fiber length distribution effects on, 307
hybrid, stiffness and thermal expansion predictions for, 229
Spectroscopy, nuclear magnetic resonance, composite interfaces and, 121
Stamping rheology, of glass mat reinforced thermoplastic composites, 368
Stress cracking, failure mechanisms and, in polyetherimide composites, 240

T

Tensile modulus, characterization of, in random glass mat reinforced thermoplastic composites, 342
Tensile strength, characterization of, in random glass mat reinforced thermoplastic composites, 354
Ternary composites, of polypropylene, elastomer, and filler, analysis of phase structure formation, 98
Thermoforming, of high performance thermoplastic composites, 280
Thermoplastics
composite structures in, polymer fibers, 10
continuous-fiber-reinforced, press-forming of, 114
random glass mat reinforced composites
analysis of model materials, 45
phenomenology of tensile modulus variations, 32
thermoforming of, 280

W

Water sorption, poly(ethylene terephthalate), poly(butylene terephthalate), effect of, 1
